## TECHNOLOGY

Jonix Non-Thermal Plasma Technology is an advanced **form of ionization** guaranteeing continuously decontaminated environments, without the use or residues of chemical substances.

Jonix Non-Thermal Plasma Technology **sanitizes environments by exploiting the decontaminating properties of the air when activated** by controlled energy produced by the special patented Jonix NTP generators. They activate the air by "exciting" the molecules (Reactive Species) that, as a consequence, attack both the polluting molecules – breaking them up – and the microorganisms, causing them structural and functional damage such as to render them inactive (biocidal action).

Jonix Non-Thermal Plasma Technology **eliminates** a wide variety of pollutants such as **viruses (including Covid-19), bacteria, molds, allergens, volatile chemical compounds and all types of odors** from the **air and surfaces**.

The active sanitization of Jonix Cube is constant: **the environment is constantly decontaminated for the entire operating time of the device**.

**Jonix Cube has been designed to sanitize environments up to 85 square meters.**

Follow the table settings to set the correct operating level according to the floor area you want to sanitize.

Floor area		Daily recommended minimum operating time*
10 m <sup>2</sup>		3 h
20 m <sup>2</sup>		3 h
30 m <sup>2</sup>		4 h
40 m <sup>2</sup>		8 h
50 m <sup>2</sup>		12 h
60 m <sup>2</sup>		24 h
70 m <sup>2</sup>		24 h

\*Operating times can be modified according to specific needs.

Download Jonix Maps from the App Store or Google Play to find places sanitized with Jonix

Jonix Cube is a device for sanitizing and decontaminating indoor environments: its advanced cold plasma technology (Jonix Non-Thermal Plasma Technology) eliminates viruses, bacteria, molds, volatile pollutants and odors from air and surfaces.

Breathing clean air, decontaminated by Jonix Non-Thermal Plasma Technology, creates optimal conditions for the body, helping to improve the general health of people; it prevents infections from airborne diseases, gives relief to breathing problems such as asthma and allergies, increases oxygen absorption, facilitates relaxation and night rest, improves concentration.

With Jonix Cube you activate your well-being one breath at a time.

# DESIGN AND RELIABILITY

Jonix Cube is made **entirely in Italy** with components that are mainly made in Italy too: our workers and our suppliers embody the best of the **nation's manufacturing industry** and take care of every detail with passion and expertise.

**Jonix Cube also has social value:** the production of some components of the devices is entrusted to Sol. Co., a social enterprise that transforms the different skills of people into resources for the whole community.

The efficacy and safety of Jonix Cubes are validated by the **main international protocols and by certified laboratory tests.**

# YOUR JONIX CUBE

**NON STOP**  
It sanitizes the air and surfaces of domestic and professional environments continuously: you can keep it on while you go about normal life in the same space, without contraindications. **With Jonix you are safe!**

**MULTIACTIVE**  
The reactive particles produced by the patented Jonix generators "hunt" for all the pollutants present in the environment (viruses, bacteria, molds, VOCs, particulates) and break them down **without leaving residues.**

**EFFECTIVE**  
Sanitizing the air using Jonix Non-Thermal Plasma technology contributes significantly **to preventing infections from Covid-19.** The effectiveness of the technology on Covid-19 was tested by the Department of Molecular Medicine of the University of Padua.

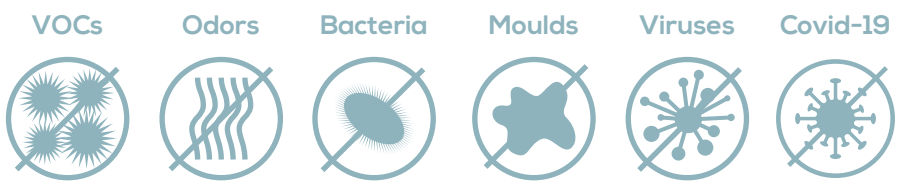

**MINIMUM CONSUMPTION**  
Jonix Cube provides high performance in sanitization and decontamination with a low energy impact: the device, in fact, consumes only 10 watts.

# USE AND MAINTENANCE

Jonix Cube **eliminates odors and chemical and organic pollutants from environments,** prevents the formation of mold and makes your environments healthier: the air will be clean, decontaminated and you will immediately feel greater freshness.

**Maintenance is quick and easy:** the display will notify you when it is time to clean the generators or replace them (after approximately 9000 hours of use). With just a few steps, in **total autonomy,** you can restore your device. On the Jonix **YouTube** channel you will find videos illustrating each step in a very clear way.
